QUALITY Web development...  
UNIQUE to your business.

## :: Why Choose Pixelmation? ::

**Our goal is to develop long-term relationships** with our clients by providing the highest quality and most advanced products, services and support.

**Every service we offer must meet the rigorous set of standards we have developed.** These standards ensure that your design, marketing and hosting needs exceed industry standards, creating a product that is as versatile as the Web itself.

**The Pixelmation team brings together a unique and effective mix of technology specialists** who can respond to your needs and translate them into continued success.

## :: Pixelmation™ Graphic Design ::

**Graphic design is the core of establishing a company image.** We don't take that lightly. We do not believe in taking a cookie-cutter approach to anything! This is especially true with graphic design.

The design concept for a corporate identity or Web site is established through brainstorming, storyboarding, and one-on-one meetings with you. Once the concept is established, the graphic design team begins creating your logo and/or Web site using state-of-the-art computer equipment and graphic tools.

# QUALITY Web development... UNIQUE to your business.

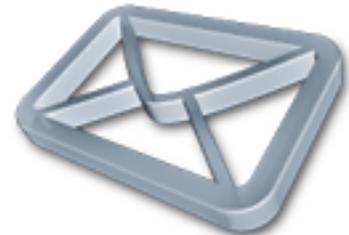

## :: Web Application Development ::

Use your Web presence as a tool to *generate additional business and improve customer management*. With advanced programming you can *increase the usefulness of your Web site far beyond what you have imagined*.

Pixelmation creates custom Web tools programmed for your specific customer and business needs. Order shopping carts, scheduling abilities, specially designed forms--whatever your precise needs may be.

### Collaboration Tools

**WEBMAIL** will allow you to access your e-mail anywhere, from any computer with an Internet connection. Quick, safe and totally secure Internet e-mail at your fingertips--just as if you were sitting at your own desk! You've seen the popular on-line mail services such as Hotmail and Yahoo! Mail. Pixelmation WebMail takes the concept a step further and provides you with ALL the features you would expect from a full software e-mail client, and combines it with your current e-mail account(s)--giving you one full service e-mail center!

**REAL-TIME TRAFFIC MONITORING** allows you to see how many people are visiting your site instantly. No waiting until the end of the month to analyze your reports and see how effective your marketing might have been. Pixelmation's monitoring ability allows you to securely log into your reports anytime and see your data by month, week, day and even hour!

**ON-LINE CALENDARS** are invaluable when it comes to coordinating meetings, posting and tracking employee schedules or keeping track of customer-related deadlines or delivery dates. We can design calendars fit for any purposes you choose.

**ON-LINE ADDRESS BOOKS** keep your customer and employee contact information and relevant notes all in one place. You, your employees and coworkers can access and update the address book as needed, reducing inconsistent and outdated information.

**PROJECT MANAGEMENT TOOLS**, built to your specifications, let you choose what you do and do not need. *Why buy off-the-shelf software* when we can build a tool that contains all the features you want without having to sift through features you do not want or need?

**DOCUMENT LIBRARY** to keep all your important documents such as contracts, agreements, invoices, marketing materials and much more all in a secure central location to be accessed from any computer, anytime. Work with managed and unmanaged documents with complete version control. This system works like a library, allowing the ability to have documents checked in and out of the system and avoiding valuable time and data loss.

# BIG business solutions...for SMALL business budgets.

## :: Web Hosting Services ::

**Part of the Pixelmation hosting service includes a variety of support.** We offer different levels of hosting packages especially for various client needs and business sizes. Why pay more than you need with typical one-package-fits-all plans? *We prize client satisfaction over all else, and that includes hosting your site.*

### New Services!

#### Real-time Visitor Reporting

Online reports allow you to instantly see how many people are visiting your site.

Pixelmation monitoring allows you to securely log into your reports anytime, day or night, and see your data by month, week, day and even hour!

#### WebMail

Pixelmation WebMail is seamlessly implemented with your existing e-mail account(s), allowing you to control your e-mail from anywhere, just as if you were sitting at your own desk.

## :: Internet Marketing ::

At Pixelmation we have in-depth, back-end knowledge of search engines and their methods of operation. We consistently research and track changes the top search engines and directories make in order to maintain our leading-edge knowledge of indexing changes and requirements.

Industry studies have shown that 85% of users find Web sites through the most popular search engines such as Google, Yahoo!, AOL, Lycos, Alta Vista and MSN. We will advise you how to properly submit to these reputable search sites, and others, so you will be prepared and able to continue your online marketing successfully.

Along with search engines, there are other marketing options we can help you with, including press releases, development of business stationary, cards and logos, logo use, promotional materials, e-commerce development, e-mail newsletters and e-mail marketing.

### Monitoring Your Success

The Pixelmation online reports allow you to instantly see how many people are visiting your site. Our monitoring system allows you to securely log into your reports anytime and see your data by month, week, day and even hour!

Many of our clients depend on these reports to track the success of their marketing campaigns!

### Real-Time Visitor Reporting

The Pixelmation Visi-Stat™ on-line reporting system tracks:

- Visitors by Day, Week, month and year!
- Where your visitors found you, Search Engines, directories, banners, link exchanges, yellow page ads, email links and more!
- Browser Type and version
- Operating System/Computer Type
- Users Screen Resolution
